

THE INCLUSION OF CHILDREN WITH AUTISM IN A PRESCHOOL OR DAYCARE SETTING HOLDS IMMENSE VALUE

A current trend among families is enrolling their children with autism in daycare and preschools, particularly when supported by an ABA provider like The Uncommon Thread. Here are just some of the benefits:

Social Interaction & Inclusion

Within a PreK or Daycare environment, children with autism can engage with their typically developing peers. This interaction plays a vital role in promoting inclusivity and improving their social skills.

Structured Learning Environment

The structured PreK environment lays a foundation for learning that benefits all children, including those with autism. This structure fosters a routine that supports skill development and academic progress.

Simultaneous ABA Therapy

Incorporating ABA therapy into the PreK or Daycare setting allows children with autism to receive personalized support and interventions amid group activities. Pull out sessions allow therapists to work on and improve foundational skills.

Professional Supervision

Our program provides a 1:1 ABA therapist with 20% BCBA supervision, ensuring each child receives personalized attention and interventions guided by the expertise of a Board Certified Behavior Analyst.

Transition to Mainstream Education

Exposure to a PreK environment facilitates a seamless transition for children with autism, better preparing them for mainstream education and supporting a smoother progression to future educational milestones.

Convenience for Families

Selecting a nearby PreK or Daycare setting saves time on travel, enabling families, especially those with children affected by autism, to dedicate more time to family responsibilities and achieve a healthier work-life balance.

The Uncommon Thread is a nonprofit ABA provider dedicated to advancing the lives of children with autism. We deliver ABA therapy and services in our centers, in-home, in-school, in the community, and in daycares and preschools. Reach out to learn more about how we can support you and ensure your child reaches his/her full potential.
